

MANITOBA ASSOCIATION OF CARDIOLOGY TECHNOLOGIST

PRESIDENT's Report

I would like to welcome you all to the 56th annual general meeting of the Manitoba Association of Cardiology Technologists. Over the past year as president of MACT I continued to see a very productive, dedicated board of directors working on behalf of our members. Each board member deserves to be proud of the work that he/ she have accomplished, and I hope that you will appreciate these efforts as well.

A huge step forward for our association was the formation of a Bylaw Committee, and the passing of new long overdue Bylaws in April of this year.

We had several meetings, both in person and through email. Our Board of Directors were frequently in contact one way or another. Some of the items that have been on our radar over the past year are as follows:

Our group is constantly looking at ways to serve our membership in the best possible way. We are reviewing banking methods that are up to date and not a huge cost to our association.

Updating our website has been a priority to provide members with information and guidelines for provincial and national matters. I would like to stress the importance of keeping your information up to date in your profile in the MACT website. If you are experiencing difficulty we are here to assist with logging in etc.

One of the greatest goals in the coming term is to raise awareness for our profession through social media (Facebook, MACT website). We welcome your ideas brought forward to the board to help us realize this goal.

At this time I would like to thank my current Board of Directors, and encourage members to participate in this year's election.

Respectfully Submitted,

Ruslan Tarasov
MACT President
